

A 'KIDS IN SHOW BIZ' SMILE WITH DR. NATALIE MANSOUR

In this Motion Picture and Television Industry, a great, charismatic smile is a staple—not just for the adults, but the “Kids in Show Biz” as well. But where can your find a great pediatric dentist that is not only thoroughly knowledgeable—but caring as well? ENTER DR. NATALIE MANSOUR, PEDIATRIC DENTIST.

Welcome to Dr. Natalie's pediatric dental office, an underwater-themed building that feels like a wonderland. Imagine being a child and walking into an office where the walls are covered with happy aquatic creatures gently greeting your “star in the making” (or certainly the star of your life!). A caring staff member (hand picked by Dr. Natalie) welcomes patients and explains the upcoming events in a child friendly and supportive manner. It is amazing to watch as your young one begins to understand that going to the dentist is not a frightening experience and that good dental health is fun!

The mission of Dr. Natalie and her staff is to help children develop a positive attitude towards dental health and to maintain lasting relationships with the patients and their families. She has known since childhood that she wanted to work with children.

After graduating from USC, Dr. Natalie went on to Nova Southeastern University where she completed both her Doctor of Dental Medicine degree and her two year postdoctoral specialty training in Pediatric Dentistry. In addition she is also board certified which makes her a Diplomate to the American Board of Pediatric Dentistry.

“I've always loved children,” remarks the stunning, personable, and oh so at the top of her game Dr. Natalie. “My career choices were either teaching or pediatric dentistry. It has been a passion of mine to educate children on the health of their teeth, and to help them understand that a trip to the dentist can not only aid them in their oral health, but it can be fun.” (This Caster Reporter loved Dr. Natalie's toy chest—brimming with fun games and

stuffed animals—it made me want to be a client!). Dr. Natalie has more than achieved her goal to treat children with the utmost care and patience. Her office offers a wide variety of treatments to ensure proper tooth development, prevent harmful cavities and help children remain calm and comfortable throughout their visits.

Most parents are unaware of the importance of the primary teeth (also known as baby teeth). Cavities in primary teeth frequently create problems that negatively affect the development of permanent teeth. As a preventative measure, the American Academy of Pediatric Dentistry recommends that patients establish a dental home by the age of one. From the beginning, it is not only vital for children to developing good oral health practices but for parents to make sure that their children's teeth are growing in a healthy and proper manner. Fortunately, the deeply compassionate and caring Dr. Natalie simplifies pediatric dental care for both the child and the parent—so that the process is both affordable and pleasant. For example, Dr. Natalie offers sealants (protectors for the grooved and pitted surfaces of teeth) that prevent cavities in all of those hard-to-reach places. Because cavities can occur even if children brush and floss regularly, sealants block food and plaque from building up and can very easily be applied in one visit.

And, as Dr. Natalie so aptly reminds us, “If good dental practices start early, it is possible to avoid all of the whitening, fillings, and crowns that many of us have had to endure later in life to have beautiful, healthy smiles.” If braces are needed as our children's teeth develop, Dr. Natalie's sister, Dr. Marie Mansour is right next door to keep that ‘perfect smile’ ball rolling!

So if you're ready to give your children an industry-ready smile as they rise to stardom (and who isn't!), contact the offices of Dr. Natalie Mansour today at (818) 500-7330 and check out her website at www.drnataliem.com. Your children and their teeth will thank-you for it—for a lifetime!
